The SOLO has an extremely tight supercardioid pattern and gives excellent results on live vocals, guitar amps and drums, plus it works just as well in the studio as it does on stage.

With superb off-axis rejection and requiring no EQ, the Sontronics SOLO is very easy to set up and use, whether you're a live sound engineer, a gigging vocalist with your own PA or a guitarist recording amps in your home set-up.

In fact, during the testing stages of the mic in various venues with a range of musicians, the SOLO outperformed many other dynamic mics including some that cost four or five times the price of SOLO!

Manufactured in Sontronics' home county of Dorset, the SOLO is engineered from a solid piece of aluminium with black anodised finish and beautifully etched logo, and it feels substantial but not too heavy in the hand.

The SOLO is supplied with a mic clip with a thread adaptor so it will fit any size mic stand, plus a zip-up, leather-effect pouch for simple storage and protection when moving from gig to gig.

### Features :

Handheld dynamic mic

Tight supercardioid pattern

Excellent off-axis rejection
