Cena: 50,00 EUR

Working closely with the global bass community, we asked 4000+ players what they needed from a bass string, and recruited 1000+ players for field trials to help improve the playability and our protective NANOWEB Coating. Inspired by our field trials, *Elixir* Strings entire line of round wound electric bass strings now benefits from a NANOWEB Coating made exclusively for bass guitar. With playing experience also enhanced by optimized string tension profiles, flexibility and feel, our Nickel Plated Steel Bass Strings deliver:

- Rich, rounded tone with greater clarity*
- Smooth, natural feel and reduced finger squeak
- Greater durability and response, even during hard-hitting attacks
- Longer tone life than any other bass string, uncoated or coated**

Elixir Strings is the only coated string brand to protect the entire string with an ultra-thin coating, keeping gunk out of the gaps between the windings. With consistent performance from gig-to-gig, *Elixir* Nickel Plated Steel Bass Strings remove the hassle and expense of frequent string changes.
