**Cena: 523,00 EUR**

RELOOP RP-7000 MK2 - DJ gramofon

**Napomena: Uz gramofon se ne dobija igla!**

### FEATURES

New features of the MK2 version:

- Built for the club: rigid chassis construction with an even heavier design with additional reinforcements made of metal, rubber and moulding compound for high vibration damping and isolation
- More powerful starting torque (adjustable from 2.8 - 4.5 kg/cm)
- Fine-tuned motor control for further optimization of wow and flutter and rotation
- Newly developed, height-adjustable tone arm base (VTA) and anti-skating control
- Particularly lightweight and rigid satin aluminium material used for tone arm
- Adjustable pitch scale for precise adjustments
- Optional ground terminal offers additional protection in complex club & studio environments
- Easily replaceable, freely rotatable LED needle illumination in new unibody aluminium design
- High-quality and hard-wearing deep black, metallic finish
- Quartz driven DJ turntable with upper-torque direct drive
- Adjustable brake speed (0.2 - 6 sec.)
- Precise control of motor with 3 speeds (33 1/3, 45 & 78 rpm)
- Precision-manufactured, die cast aluminium turntable
- Rubber inlays for reduction of vibrations and background noise
- Statically balanced universal S-shaped tone arm with hydraulic lift and anti-skating mechanism
- Universal connection for pick-up systems (SME)
- Pitch range +/-8 %, +/-16 %, +/-50 % (ultra pitch)
- Quartz lock
- Additional start/stop button for vertical positioning
- Reverse function: switch for forward and reverse playback

Recessed connection cavity for easy flight-case  
installation & seamless adjustment  
Phono and line out (no grounding required)  
Removable mains and RCA cables  
Safety mains switch  
Shock-absorbing feet against vibrations  
Incl. turntable, slipmat, LED needle light,  
counterweight, phono RCA cable with grounding, power  
cord, operating instructions, without cartridge

Weight:  
approx.  
11.7 kg
